

Exemption from provisions of Health and Safety at Work (Asbestos) Regulations:

In accordance with section 220 of the Health and Safety at Work Act 2015 (the Act), I, Gordon MacDonald, Chief Executive, exempt Antarctic Heritage Trust from compliance with the following provision(s) of the Health and Safety at Work (Asbestos) Regulations:

Regulation 41(2)(a)
Regulation 43(1)
Regulation 46(6)

I do so –

- being satisfied that:
 - the extent of the exemption is not broader than is reasonably necessary to address the matters that gave rise to it.
 - the exemption is not inconsistent with the purpose of the Act.
 - The persons undertaking the asbestos removal and clearance monitoring work are fully competent to do so and work will be carried out to the required standard using the required methodology and equipment.
- subject to the following conditions (also detailed in Appendix A):
 - The person commissioning the work must comply with their duties in regulations 41, 43 and 46 as if Mr Hindle were a licenced asbestos assessor.
 - The person undertaking the air monitoring and clearance testing is competent to undertake these tasks
 - Results of the clearance testing are to be provided to Richard Steel, CAR Team Leader, within 20 working days of completion of the asbestos removal.
 - The exemption only applies to the removal of friable asbestos from Sir Edmund Hillary's Hut at Scott Base, Antarctica in November 2016

This exemption takes effect on 20 October 2016 and expires on 20 October 2021 unless it is sooner replaced or revoked.

Exemption from provisions of Health and Safety at Work (Asbestos) Regulations:

In accordance with section 220 of the Health and Safety at Work Act 2015 (the Act), I, Gordon MacDonald, Chief Executive, exempt Richard Hindle from compliance with the following provision(s) of the Health and Safety at Work (Asbestos) Regulations:

Regulation 57(1)

I do so –

- being satisfied that:
 - the extent of the exemption is not broader than is reasonably necessary to address the matters that gave rise to it.
 - the exemption is not inconsistent with the purpose of the Act.
 - The persons undertaking the asbestos removal and clearance monitoring work are fully competent to do so and work will be carried out to the required standard using the required methodology and equipment.
- subject to the following condition:
 - Mr Hindle must use the membrane filter method when carrying out air monitoring and must otherwise comply with the duties in the regulations as if he were an independent licenced asbestos assessor

This exemption takes effect on 20 October 2016 and expires on 20 October 2021 unless it is sooner replaced or revoked.
